EDUCATION

University of Pennsylvania 08/2025 - 06/2027
MSc, Computer and Information Technology Philadelphia, PA

- Coursework: Intro to Software Development, Intro to Computer Systems, Mathematical Foundations of Computer Science

National Tsing Hua University 08/2020 - 06/2024
B.B.A, Economics, GPA: 3.86 / 4.3 Taiwan

- Coursework: Statistics, Calculus, Linear Algebra, Statistical Data Analysis, Data Visualization of Big Data in Education

SKILLS

- **Frontend Development:** JavaScript, TypeScript, React.js, HTML/CSS, Figma
- **Backend & Data:** Python, Java, R, SQL, Node.js, REST APIs, AWS, GCP, Docker, GitHub
- **Data Visualization & Analytics:** Power BI, Tableau, Google Analytics, Google Search Console

WORK EXPERIENCE

EY Advisory Services Inc. 03/2024 - 06/2025

Technology Consultant

Data Engineering & Machine Learning

- Built a centralized data platform by consolidating multi-source datasets, ensuring consistent and scalable data access; designed ER diagrams and schemas to support recommendation system development
- Developed ETL pipelines integrating CRM and automotive client data using Python and SQL; applied cleaning, deduplication, and standardization, reducing data errors by 70%
- Engineered clustering and personalization models with BigQuery and Vertex AI; implemented K-means clustering for user segmentation and delivered ML-driven product recommendations, improving accuracy
- Fine-tuned GPT-3.5-turbo with domain-specific data for automated response validation; integrated into Salesforce via API, reducing error rates and manual review time

Analytics & Automation

- Automated financial reporting workflows with Power BI and Python, reducing manual reporting effort by 80% and enabling real-time revenue and project analytics
- Deployed Selenium-based RPA for financial data extraction and scheduled reporting, streamlining workflows, minimizing processing time, and ensuring high data accuracy

DFI Inc. 06/2023 - 11/2023

Data Analytics Intern

- Utilized Google Search Console and Google Analytics to implement SEO strategies, improving keyword rankings by 60%, increasing the company's visibility, and driving more organic traffic to the website
- Used Python to scrape website keywords, collecting data for competitor analysis. This analysis allowed for the identification of high-potential keywords and helped adjust the company's strategy

SELECTIVE PROJECTS

Geospatial Data Pipeline & Mapping - Python / GeoPandas / Scikit-Learn / Folium / Rasterio 08/2025

- Designed and implemented an end-to-end geospatial pipeline (data ingestion, preprocessing, ML training, visualization) with interactive map applications, automated CSV/HTML outputs, and scalable deployment.
- Applied software engineering best practices including modularized code, reproducible environments, and version control to enable open-source collaboration.

Web Development for Personal Website - React.js / TypeScript / JavaScript / HTML / CSS 06/2025

- Designed and implemented a responsive personal portfolio website to showcase professional background and projects, ensuring optimized performance across desktop and mobile platforms
- Integrated EmailJS contact functionality and structured content sections to improve user interaction and recruiter accessibility

CERTIFICATES

- Deloitte Data Analytics Job Simulation – Data Modeling / Data Analysis / Tableau 07/2025
- JPMorgan Software Engineering Job Simulation – Java / Spring / Kafka / SQL / RestAPI 07/2025
